Program Description

Compliance with the annual training requirements for Hazardous Communication and the NYS Right to Know Law and Bloodborne Pathogens has never been easier. Districts can now participate in the Questar III on-line training modules which enable faculty and staff to complete the trainings at individual times during the school day. In participating within this service, valuable time can be freed up during Orientation and Superintendent's days allowing for more productive use of resources. Each module contains an easy to follow review of the applicable standards followed by a quiz at the end. A Certificate of Completion is automatically generated and emailed to the attendee upon a successful score of 80 or better. This delivery module also enables districts to maintain compliance by providing an avenue for make-up trainings for faculty/staff and to ensure temporary/substitute employees are properly trained in the standards.
